Koby Mashiach – Flutter Developer

koby9779@gmail.com | 050-8247743 | Jerusalem, Israel |Website |LinkedIn | Git

Experienced Flutter Developer with deep knowledge of Dart, Firebase, and state management solutions such as Riverpod and Bloc. Motivated for my next challenge in a company that values a great team player and self-learner to build end-to-end mobile applications and solve complex challenges with innovative solutions.

EXPERIENCE

2025 - Present - Flutter Developer at Headon Led the development and shared total ownership of two major mobile applications, including an automotive application for the **Israel Electric Company (IEC)** within a **Company Portal & Azure** ecosystem.

- Managed and mentored one developer while driving project scope, feature ideation, and partial UI/UX design.
- Independently built and delivered a large-scale application from scratch, while collaborating with a team on a second major project.
- Developed advanced native features including **Maps**, native **HomeWidgets**, and **Quick Actions**.
- Worked extensively across a multi-language technical stack combining **Flutter, Kotlin, Java, and Swift** for seamless native integrations.

2023 - 2025 - Flutter Developer at Algoretail Company

I developed **Flutte**r applications tailored for the retail industry to enhance user experience and optimize app performance. The applications were built using **Dart** and integrated with **REST API** servers and **Firebase** for seamless backend operations.

- Utilized **Bloc state management** to ensure predictable and scalable application architecture.
- Implemented optimized and scalable solutions, improving app performance and boosting key metrics.
- Collaborated with cross-functional teams to address challenges and deliver high-quality retail-focused applications.

2021 - 2023 - K&H Easy Dev - Freelancer Developer

Experienced Flutter developer specializing in **creating applications from scratch**, fixing existing apps, and implementing design solutions to meet client needs. Proficient in working with **Google Play Console, Apple App Store, and TestFlight**, with extensive experience in creating **certificates**, app signing, and publishing applications.

- Developed robust applications for diverse businesses**, including chain stores and startups**, enhancing operational efficiency and customer engagement.
- Delivered tailored solutions to small businesses, driving digital transformation and competitive advantage.
- Implemented designs with precision and ensured optimal performance improvement for existing applications.
- Expert in managing end-to-end Flutter projects, offering services such as performance tuning, feature development, and seamless app updates.
- Enhanced **UX/UI** for a seamless and engaging user experience.
- A six-month project based on **native** technology, including **Java** and **Kotlin** for Android and **Swift** for iOS

EDUCATION

2018-2022 Practical Software Engineer, Afeka Tel Aviv Academic College of Engineering

Center End of year project: Developed a Flutter application integrated with Firebase to manage events such as weddings, birthdays, and more.

Created and managed events, including suppliers, venues, catering, and additional services.

Implemented state management using Bloc and Provider to ensure scalability and efficiency.

Focused on user-friendly design and seamless functionality to optimize the event planning process.

Leveraged Firebase for real-time data synchronization and secure storage.

MILITARY

2015-2018 ICT Sergeant, Judea and Samaria
